

Instructions to be read to the test subject

Thanks for the time to part in our usability test for TrackStudio! The goal of this test is to test our software and get your feedback on how we can make TrackStudio a better, smoother experience. Our goal is to create a simplified sound recording application that works in modern web browsers. We differentiate our application by presenting you with "creative constraints". We believe this will help you focus on your music rather than the technicalities associated with other sound recording applications.

User Name: _____

Check List

- ☐ Ensure you're at <https://...> instead of <http://...>
- ☐ Allow microphone access to the website
- ☐ Sign up
- ☐ Use tutorial after sign-up

Tasks within the Tutorial
