User's Name: _____

Thanks for the time to part in our usability test for TrackStudio! The goal of this test it to test our software and get your feedback on how we can make TrackStudio a better, smoother experience. Our goal is to create a simplified sound recording application that works in modern web browsers. We differentiate our application by presenting you with "creative constraints". We believe this will help you focus on your music rather than the technicalities associated with other sound recording applications.

Check List
